Indication of the accuracy of the time in the time-stamp, and the period of time for which TSA event logs are maintained (and hence are available to provide supporting evidence) can be found in the Time-stamp policy under section 6.2 and 6.3.																																							
Obligations of subscribers:	The description of, or reference to, the critical subscriber obligations.	<p data-bbox="996 1133 2094 1189">Subscribers must verify for each fresh time-stamp token that it has been correctly formatted and correctly signed and check that the TSU certificate is valid and that the certificate expiration date fits the Subscriber’s needs.</p> <p data-bbox="996 1204 2094 1236">Subscribers must use secure cryptographic suites for time-stamping requests.</p> <p data-bbox="996 1252 2094 1284">Subscribers should inform their end-users and other Relying Parties about the Time-Stamp Policy.</p> <p data-bbox="996 1300 2094 1332">Subscribers should include or archive the TSU certificate status information with the object to be time stamped.</p>																																							

Statement types	Statement descriptions	Specific Requirements of certificate policy
		<p>Subscribers should rely on DNS services that respect the TTL value of the A record when accessing the time-stamp services and certificate status services.</p>
<p>TSU public key certificate status checking obligations of relying parties:</p>	<p>The extent to which relying parties are obligated to check the TSU public key certificate status, and references to further explanation.</p>	<p>Before placing any reliance on a time-stamp, a Relying Party must verify that the time-stamp has been correctly signed and that the certificate used to sign the time-stamp was valid at the time indicated in the timestamp.</p> <p>The Relying Party must take into account any limitations on usage of the time-stamp indicated by this Time-Stamp Policy.</p> <p>For qualified time-stamps, ETSI EN 319 421 states: “The relying party is expected to use a Trusted List to establish whether the timestamp unit and the timestamp are qualified. If the public key of the TSU is listed in the Trusted List and the service it represents is a qualified time-stamping service, then the time-stamps issued by this TSU can be considered as qualified.”</p> <p>During the TSU certificate validity period, the status of the certificate can be checked using the relevant CRL. ZETESCONFIDENS CA certificates, TSU certificates and the related CRLs are published at https://crt.tsp.zetes.com and https://crl.tsp.zetes.com.</p> <p>Relying parties should rely on DNS services that respect the TTL value of the A record when accessing the time-stamp services and certificate status services.</p> <p>If this verification takes place after the end of the validity period of the certificate, the Relying Party should follow the guidance denoted in Annex D of ETSI EN 319 421.</p>
<p>Limited warranty and disclaimer/Limitation of liability:</p>	<p>Summary of the warranty, disclaimers, limitations of liability and any applicable warranty or insurance programs.</p>	<p>See Certificate Policy and Certification Practice Statement (CP/CPS) for CA for TSA: Section 9.2 on insurance coverage, Section 9.6 Representation and warranties, Section 9.7 Disclaimers of warranties and section 9.8 Limitations of liabilities</p> <p><i>Within the limit set by Belgian Law, in no event (except for fraud or willful misconduct) will ZETESCONFIDENS be liable for:</i></p> <ul style="list-style-type: none"> • <i>Any loss of profits;</i> • <i>Any loss of data;</i> • <i>Any indirect, consequential or punitive damages arising from or in connection with the use, delivery, license, and performance or non-performance of certificates or digital signatures;</i> • <i>Any other damages beyond proven direct damages as described below.</i>

Statement types	Statement descriptions	Specific Requirements of certificate policy
		<p><i>In case of liability of ZETESCONFIDENS towards the Subscriber or a Relying Party for proven direct damages, the liability of ZETESCONFIDENS towards any claimant is in any way limited to:</i></p> <ul style="list-style-type: none"> - <i>paying damages amounting up to a maximum of 50 € per transaction, for events where the Relying Party relies on the certificate and time-stamp token (TST):</i> <ul style="list-style-type: none"> a) <i>as regards the accuracy at the time of issuance of all information contained in the (Qualified) Certificate and as regards the fact that the Certificate contains all the details prescribed for a (Qualified) Certificate; or</i> b) <i>for assurance that at the time of the issuance of the Certificate, the signatory identified in the Qualified Certificate held the private key corresponding to the public key given or identified in the Certificate; or</i> c) <i>for assurance that the private key and the public key can be used in a complementary manner; or</i> d) <i>as regards the accuracy of the time mentioned in the TST;</i> <p><i>and</i></p> <ul style="list-style-type: none"> - <i>paying damages amounting up to a maximum of 200 € in total per TSU Certificate that is underlying to the claim.</i> <p><i>In any case, whatever originating facts and prejudices and their aggregate amounts, ZETESCONFIDENS responsibility will be limited to the amount paid by the Subscriber to ZETESCONFIDENS regarding the originating fact, with respect to the governing law.
